

Roll Products Anesthesia Tapes

Our most popular product - For a reason!

Our line of medical tapes and labels are designed with professionals in the industry. We are in contact with our consultant, Gregory James, M.D., at The Johns Hopkins Medical Institutes, asking for his insights and opinions as we continue to develop this exciting line!

Drug Tapes are available in either rolls of ½" x 500" or 20 pre-cut tape strips on 3" x 5" cards. Please keep in mind, that due to the constant fluctuation of new drugs, dosage, and administration guidelines, we do not offer any anesthesia tapes as "stock" products - every order is custom, but without custom pricing!

RPI has redeveloped our Drug Title Tape system to not only be in accordance with the medical environment today, but to be organized in a way that will allow easier and less confusing ordering for your customers. The new system is updated to comply with the new American Society for Testing and Materials Guideline (ASTM D4774-94). If you would like to begin a line of Anesthesia Tapes, contact us about offering sets. They are offered in our Col R Tone line of Color-Coordinated tapes in order to keep mistakes to a minimum for the medical community.

Below is a list of more than 20 sets of drug tapes that we have offered to customers in the past, with each set containing many drugs and applications. Think of the list below as a launching pad to create your own system... Please contact us and tell us what your customers need!
